

East Meru Community School Workshop Machinery Appeal 2025.

Please could you help!

Our Workshop Building on Progress

Dear Friends and Family of East Meru Community School,

As many of you know, supporting children from underprivileged backgrounds means constantly seeking new ways to improve their future. At East Meru Community School, we believe that long-term change begins with early empowerment.

That's why we're excited to announce a new initiative: introducing practical skills training at the Primary level. This program will not only enrich the education of all our students, but also provide a vital pathway for those who may not transition to secondary school after completing Standard 7. By equipping them with hands-on skills, we aim to open doors to self-reliance, employment, and dignity. We're launching an important appeal to make this vision a reality and we'd love to share it with you. Your support can help us build a future where every child, regardless of academic outcome, has the tools to thrive.

At EMCS, we believe that every child deserves the opportunity to learn. This is why we accept students without interviews, regardless of their background or academic ability. While we strive to support all learners, we acknowledge that some students face academic challenges, especially in the upper primary grades. To help these students thrive and to support youth in our wider community, we are excited to announce the launch of our **Vocational Skills Project**. This program will provide training in brickmaking, carpentry, welding, and basic construction valuable skills that will open up new pathways for many of our students.

Our long-term friends and supporters from **Pymble Ladies' College** visited us in June/July and stayed for five days. During their visit, they joined hands with our parents to begin laying the foundation for our new vocational workshop. The girls worked incredibly hard, and we are deeply grateful. They generously raised enough funds to cover the construction costs of the workshop and construction is now well underway! The final piece of support we are seeking is **equipment** for the workshop which is: a brick-making machine, welding machine, and carpentry tools. To be able to set up all our goal is to raise 10,000USD this amount will cover everything including professional technicians.

Once again, thank you so much for your ongoing support and for being part of our EMCS family. Together, we are building a brighter future for our children and community.
